## OVERVIEW

My lifelong dream has always been to become an editor in the film industry. For now, I'm a 28 year old software engineer currently located in Southern California. I graduated from California State University, Long Beach with a BA in Film and Electronic Arts with a focus on Editing and a minor in Web Technology and Applications. I spend the majority of my day on the computer, and I can get pretty creative with one. I tend to be a stickler for perfection, and I am always searching for ways to improve or enhance my creative work. I believe this trait pushes me to be better each time. When I am not on the computer, I spend my time being a really nice guy, always ready to meet someone new.
